Lean Practitioner

Description

Pro-CI is seeking a lean practitioner who will perform meaningful, transformational work with Fortune 500 organizations while working with exceptionally talented, fun, and interesting people. This is an opportunity to join a team going through a period of explosive growth. The Lean Practitioner is responsible for assisting client organizations in optimizing processes to achieve efficient results. It consists of process redesign and business reengineering that reduces cost (rework) and cycle times, while improving quality, and operational performance in order to enhance the client or customer experience. This position is committed to continuous improvement through the management of data, the leveraging of technology, and the redesign of processes, leading to the most efficient and effective work processes that are repeatable and sustainable across the client organization.
